

# King Custom

High Traffic • Indoor/Outdoor • Berber Texture

The King Custom mat is the ultimate high-density, hard-wearing logo mat for both indoor and outdoor applications.

Ideally suited for areas with high footfall and severe weather conditions, the Berber style carpet, which is made from 54-ounce polypropylene fiber, will not only keep floors clean, it is practically indestructible.

Laser-cut inlaid graphics produce a classic looking colorfast design that will not fade or wear off by heavy foot-fall, cleaning or ultraviolet rays. Laser cutting allows exact sizing down to 1/16 of an inch.

The King Custom mat has skid-resistant rubber backing, with low profile edging that prevents slipping or tripping. It is also available with plain edging.

The overall thickness is 1/2".
