

Spaghetti Mats

The Only Mat that Loves Water and Sand

Spaghetti mats are a favorite mat for holiday resorts, beach shops and beach bars as they are the most effective solution for trapping sand and water.

They are also excellent for pool areas, hotel cabanas, schools and apartment complexes. The spaghetti texture is slip and skid resistant and is soft on bare feet.

The unbacked version allows sand and water to sift through, it's also available in a solid rubber backing.

Choose from our menu of factory-ready colors or create custom colors to match logos or decor. Their vibrant colors don't fade from long-term sun exposure.

The mat is made from 20% recycled materials and is 1/2" thick.

The Spaghetti mat comes with either a solid backing or no backing, and with or without beveled edging.

All mats are custom sized.

Ideal Placement

Pools • Resort Hotels • Spas • Showers • Beach Restaurants
